

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

resemble a snout. The tusks were distorted laterally, so as to occupy a space of 18 feet in width.

Scapulæ and ilia.—These having been deficient, were very ingeniously pieced out with wood, glued over so as to resemble bone.

Feet.—The feet were ludicrously made up of carpal and tarsal bones, and presented the wonderful anomaly of 4 phalanges to each toe.

Several other discrepancies were observed; apart from which Dr. G. considered the skeleton one of very great interest.

MEETING FOR BUSINESS, OCTOBER 26, 1841.

PROFESSOR W. R. JOHNSON, in the Chair.

After the usual reports of committees and other private business, the Society proceeded to ballot for new members; whereupon Mrs. Lucy W. Say was unanimously elected a member of the Academy.
